Menu-Driven Calculation Program

Requirements:

HTML Structure:

- Create a **Open Menu** button. **(Figure 01)**
- Create a container to display the menu items from a JavaScript array.
- Create a form to submit the selected menu number.

JavaScript Functionality:

- Define a JavaScript array menuArray containing the following menu items:
menuArray = ["1. Factorial", "2. Triangle number", "0. Exit"];
- Implement a function to display the menu when the **Open Menu** button is clicked. **(Figure 02)**
- Implement a function to handle form submission for the menu number and display the relevant form for the chosen calculation. **(Figure 03 & Figure 05)**
- Implement individual functions to handle each calculation:
 - Factorial Calculation:
 - Display a input box to input a number. **(Figure 03)**
 - Calculate and display the factorial of the number. **(Figure 04)**
 - Hide the input box and return to the menu selection after displaying the result. **(Figure 04)**
 - Triangle number:
 - Display a input box to input number. **(Figure 05)**
 - Calculate and display the triangle number. **(Figure 06)**
 - Hide the input box and return to the menu selection after displaying the result. **(Figure 06)**
- Ensure that the menu reappears after performing a calculation until the user selects the exit option (0 - exit). **(Figure 07 & Figure 08)**

Figure 01

Figure 02

Calculate Factorial

Figure 03

Factorial of 3 is 6

Menu

1. Factorial
2. Triangle number
0. Exit

Figure 04

Calculate Triangle number

Figure 05

Triangle number of 10 is 55

Menu

1. Factorial
2. Triangle number
0. Exit
